Re: LRPI 2006 Restoration Projects

Dear Mr. Brown:

I would like to reiterate my continued support for the Loxahatchee River Preservation Initiative and specifically for all of the proposed projects to be funded in the upcoming 2006 fiscal year. Your committee has been doing a wonderful job of administering restoration projects throughout the Loxahatchee River Basin and surrounding areas. I think all of the projects that are scheduled for this coming year look like excellent projects that will benefit not only the human communities, but also the wildlife and overall environment as well.

I believe the State of Florida needs many more organizations such as the LRPI to help offset the excessive amount of human development and population growth within the state. I firmly support all of the 2006 projects and I would like to commend the Initiative and all of the Board members on the wonderful job they are doing.

Sincerely yours,
Cotleur & Hearing, Inc.
